

In 2023, there will be several new rule changes for pickleball. Some of the most notable changes include:

- Spin serves are no longer legal. Players must hold the ball in their non-serving hand and simply toss it in the air without adding spin to the toss.
- Players should avoid wearing clothing that closely matches the ball's color because it can be difficult to identify fouls sometimes. And if you make a mistake, you might get penalized by the refs.
- Clarifications have been made regarding faults, so now you'll have a better idea of what constitutes a fault and how many penalty strokes you'll get if you commit one.
